

ADVANCED BIOLOGY
TEXTBOOK SCAVENGER HUNT
CAMPBELL

Do not write on this paper. Please respond on a separate sheet of notebook paper with your name, date and period in the upper right-hand corner.

1. What is the complete title of your Biology textbook?
2. What percent of the authors are female?
3. What important idea were the authors trying to get across to us by using the word "Connections" in the title?
4. How many chapters are found in your book?
5. How many units are there in your book?
6. Where is your book's CD ROM?
7. What does figure 9.8A show us?
8. On what page is color blindness discussed in your textbook? What is its concept number and title?
9. What are the titles of Appendix 1,2, and 3?
10. What two major sections come after the Appendices?
11. Define the term "radioactive isotope" as it is in the textbook.

Chapter organization

12. What is found on the left margin of the first page of chapter two?
13. At the top of some pages you will find an orange stripe. What are they called and why have the authors added them?
14. On page 18 and 19 how many main concepts are discussed?
15. What do you find next to the large question marks at the end of each concept?
16. Which of these three concepts have a media reference?
17. Why do some of the words have bold print?
18. What color strip is used at the top of the page for real stories that connect biology to your personal life? If you say gray you may be color blind, a fascinating topic in the study of genetics that we will learn about later.
19. Name and give a short description of the usefulness of the five resources found at the end of chapter two that will help you study.
